Dear Co-laborer,

INVESTING

April-June 2021

INVESTING IN: GLOBAL MISSIONS

In May, we had the privilege of hosting our annual missions conference and two new missionary families joined us. The church responded with generous hearts and our faith promise commitments are up this year. Our church's goals regarding missions in 2021-2022 are: 1) to be able to give close to \$9K to global missions 2) to be able to start supporting our 11th and 12th missionary families.

Latin America is quickly becoming the deployment center for world evangelism.

Please pray that our church will continue to develop a missionary heart and soon become a launching pad for global missions.

We have the tremendous opportunity to ship down 1 million full-color tracts that have been printed and donated (through Macedonia World Baptist Missions Inc.) for distribution. We will need to cover the in-country costs from port to warehouse (\$3000). With a little financial help, we can be sure to distribute 1 million gospel tracts across Central America.

INVESTING IN: FUTURE LEADERSHIP

Spiritual leadership can be difficult to develop in a culture where male authority is hardly respected, much less, taken seriously. God has proven that against all odds, He can still work miracles. These three men (Jesus, Oscar, and Ever) have chosen to dedicate time to Bible study so they can be more capable leaders, as well as, more effective servants. They are currently studying virtually *Life of Christ* and a verse by verse study through of the book of James. What an awesome privilege to invest in the future of our church leadership! Please pray for them as they strive to be diligent and disciplined as they balance family, ministry, and studies.

INVESTING IN: MINISTRY FACILITIES

A big vision brings with it great anticipation as you see the different projects unfold and develop taking you closer to that vision. In order for our vision for Hope Baptist Church and its ministries to become a reality, we must have facilities. Recently, several windows have been installed and we are currently completing the stuccoing project on the inside of the new multi-purpose building. We are anxious to be able to use the classroom space for our future bilingual Christian school along with the larger auditorium for church services and activities. The church has outgrown the

warehouse space that we have been using provisionally the last few years. We are asking for God to miraculously provide for the projects that stand between where we are now and where we need to be. The projects that are in need of financial help are as follows:

1. Pouring the main concrete floor in the auditorium (rebar, cement, and labor)
2. Installation of electrical distribution system in the new building

Because He Lives,
