Dear Pastor & Friends

Greetings in the name of our Lord. It is the blessing and the long sufferings of God , that He allows us to serve Him and delight in His presences. Try to imagine how He feels when we as children of God do not obey, it is certainly sad. I want to praise my Lord all the way home to Glory.

We have seen God working in the hearts of some our people. It is always a blessing when you have someone say " Preacher, thank you for listening to the Holy Spirit of God, because that is exactly what I needed to hear in my life personally " . When the Lord gives strength we all will agree that all of our life's are helped.

We were able to get a church van and have it going for each of our services. We have several elderly that now ride to church & will be there for each service unless they are sick. They are thankful for the ride & able to get there. There are still some that have not returned since the Covid issues, so sad. There are several shut ins, that just cannot attend, so during visiting with them, we sing, read scriptures, prayer time. Summer time brings the challenges, of many being on vacation, but thankful to see some visitors showing up for church services. Please continue to pray as we go out door knocking inviting others to attend the church services. Recently we just replaced our main church sign, trying to get some much needed repairs done on the building also.

Phoenix, our grandson, is being home schooled he will be in 9th grade this yr, he has been with us going on 9 yrs now. About 8 weeks ago, Sandy started having some serious pain in her left side, lower back. This went on for about 2 weeks. She never has health issues or any pain, so was very concerning. She went to her Dr. so it was a process of ruling out this or that. By the next day the pain was unbearable, her Dr. sent her straight to the ER, so they could do testing immediately. This turned out with a 8 hr ER stay, ruled out blockages, kidney stones, & list went on. All the test, scans, ultrasound were all clear. Emergency Room Dr. consulted with her Dr. she would need to see a Specialist of some sort, so sent her home with pain meds, but no answers. Two days later, Sandy discovers a rash, break out on her left side, she knew then it was Shingles , went to the Dr again to confirm. Took almost 3 weeks for the break out to show up. She has had a hard case of Shingles, very intense pain, as many know nerve pain is the worst of all. She has improved in the past 2 weeks, but there is that lingering pain that shows up, and the tingling, numbness in her left side. Dr says this can go on for weeks, even months. Please keep her in prayer. Through all this we have managed to get our garden in. Please pray for rain in our area. We are still at Stage 2 fire restrictions. We are in the Monsoon season for rain, but its like it is raining all around us. We do appreciated all your prayers & your supporting of the ministry here in Northern, Az . May God bless each of you.

Yours in Christ,

Luther & Sandy Quintana
